Jaskirat Singh

Implementation Specialist | Enterprise SaaS | ERP/DMS Integrations | AI & Automation
Gurugram / Ambala, Haryana, India | +91-9518815044 | singhjass6404@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Implementation specialist who works both sides of an **enterprise SaaS** rollout: runs **discovery**, maps current- and future-state workflows and writes **BRDs, FRDs, user stories and acceptance criteria** that engineering can build and QA can test; defines **ERP/DMS data mappings** and transformation rules and works hands-on with **REST APIs**, **Kafka** and **SQL/PostgreSQL**; and owns delivery for **Coca-Cola** bottlers from **change-request analysis** through **SIT/UAT**, **go-live** and **hypercare**, applying **AI tools** throughout.

WORK EXPERIENCE

Salescode.ai Gurugram, India
Senior Technical Project Development Associate Jul 2024 – Present

Business Analysis & Requirements

- Led requirements and discovery for a wholesaler-to-retailer ordering platform at a **Coca-Cola Thailand** bottler (**~20% of Coca-Cola consumption in Thailand**), running **workshops** with business, sales, operations and IT teams and analysing **current- and future-state workflows** and gaps to turn ambiguous asks into buildable, testable requirements.
- Analysed **change requests** end to end: clarified expected behaviour with users, ran **impact analysis** on dependent modules and data, and steered each change through build, UAT, release and production validation.

Solution Design & Functional Documentation

- Authored **BRDs, FRDs and functional specs** with user stories, acceptance criteria and validation scenarios, plus **data-mapping documents** defining field-level mappings, transformation rules and expected API behaviour.

ERP/DMS Integration & Data Mapping

- Mapped **source-to-destination data flows** between customer **ERP/DMS** systems and the platform (master data, pricing, stock, orders) and delivered **API-driven integrations** over **REST APIs** and **Kafka** with delta syncs and scheduled jobs, **cutting manual intervention by ~35%**.

Testing, UAT & Release Management

- Coordinated **SIT and UAT** with business users and QA from requirement-based test scenarios: end-to-end workflow checks, **Postman** API tests, **SQL** backend validation, **defect triage**, retests and regression, through to **business sign-off and release readiness**.

Production Support & Delivery

- Led **go-live, hypercare** and post-release validation, tracing failures to **root cause** with SQL, logs and **AWS CloudWatch**, coordinating fixes with engineering and feeding recurring issues back to product to keep integrations **stable in production**.
- Tracked milestones, dependencies, risks and blockers in **Jira**, ran delivery reviews and Scrum ceremonies, reported progress in **Excel and PowerPoint**, and standardized rollouts with **SOPs, runbooks and KT documents**.

AI-Assisted Implementation

- Use **Claude Code** and **ChatGPT** to speed up requirements analysis, data-mapping drafts, SQL validation, test scenarios and documentation, reviewing every output.

CAW Studios India
Associate SDET (clients: Postman, Paytm, Celito) Nov 2023 – Jun 2024

- Automated **API, integration and regression tests** in **Postman** and **Playwright**; logged defects and retested fixes.
- Validated backend data in **SQL/PostgreSQL** with cross-system checks, **improving reporting accuracy by ~25%**.

SKILLS

Business Analysis: Requirements Elicitation, BRD, FRD, User Stories, Acceptance Criteria, Gap & Impact Analysis, Change Requests
Implementation: Solution Design, Stakeholder Management, Process Mapping, Workflow Design, Go-Live, Hypercare
Testing & Quality: SIT, UAT, API & Integration Testing, Defect Triage, Regression Testing, Data Validation, Reconciliation
Data & Integration: SQL, PostgreSQL, MySQL, REST APIs, Kafka, JSON/XML, ERP/DMS Integration, Data Mapping, ETL Concepts
Delivery & Reporting: Agile, Scrum, SDLC, Jira, Confluence, Risk Tracking, Release Coordination, Excel, PowerPoint, MIS Reporting
AI & Tools: Claude Code, ChatGPT, Gemini, AI-Assisted Analysis, Workflow Automation, Postman, Playwright, Git, AWS CloudWatch

SELECTED PROJECTS

ReliveCure | Call Intelligence & Lead Lifecycle Platform Freelance
Android (Kotlin, Jetpack Compose), Node.js, PostgreSQL, React, Gemini, Railway

- Turned a clinic's scattered sales data (Meta Ads leads, calls from reps' phones, recordings, WhatsApp chats) into **one system of record**, from requirements to delivery, then **handed it over to the company's internal team**.
- Designed the **PostgreSQL data model** tying each lead to its calls, recordings, transcripts, AI analysis, WhatsApp chats and events; **matching and dedup rules** cut **~128,000 raw call records to ~98,000 unique calls**, **90.7%** tied to a lead.
- Ran processing as **tracked stages** (ingestion, matching, transcription, AI analysis, reporting) so incomplete records surface instead of skewing reports; as of 3 Nov 2026: **10,880+ leads**, **13,700+ AI-analysed calls**, **100,000+ timeline events**.
- Reconciled leads, calls and rep activity into **speed-to-lead reporting**: of **1,895** new leads in October 2026, **96%** were called and **86%** within 24 hours.

EDUCATION

Chitkara University Punjab, India
B.E. Computer Science; GPA: **9.7/10** 2020 – 2024
