Solutions Consultant | Implementation Consultant | Enterprise SaaS & AI-Assisted Delivery

Profile Summary

Enterprise SaaS consultant specializing in **Solutions Consulting, Implementation Consulting, Business Analysis, and Customer Success** for global customers including **Coca-Cola** across **Thailand**, the **Philippines**, and North India. Experienced in enterprise integrations, stakeholder management, production support, UAT/SIT, and go-live delivery, translating business requirements into scalable technical solutions. Strong expertise in **SQL, REST APIs, Kafka, AI-assisted delivery**, and root cause analysis across enterprise systems.

Experience

Salescode.ai — Gurugram (Coca-Cola PH, Thailand, North India)

Jul 2024 — Present

Senior Technical Project Development Associate | Enterprise SaaS Implementations & Solutions Consulting

- Owned technical delivery for enterprise SaaS implementations, acting as the primary customer-facing consultant while coordinating engineering, QA, product, and business stakeholders from discovery through deployment and post-go-live support.
- Led post-sales discovery and solution design workshops for enterprise clients, gathering business and technical requirements from leadership, sales, operations, and technology stakeholders and translating them into implementation roadmaps.
- Spearheaded implementation planning, customer onboarding, and go-live readiness for **Coca-Cola Thailand's** wholesaler-to-retailer ordering platform, enabling business process digitization across a significant portion of the company's distribution network.
- Facilitated onsite stakeholder workshops in **Thailand** to gather business requirements, validate operational workflows, evaluate solution feasibility, and translate business needs into technical execution plans.
- Partnered with product, engineering, and business stakeholders to prioritize requirements, define project scope, manage delivery risks, and drive execution across multiple sprints.
- Coordinated recurring Scrum ceremonies, delivery reviews, and project planning sessions with client teams and internal engineering to ensure timely issue resolution, requirement alignment, and successful execution across concurrent projects.
- Designed and implemented API-driven integrations across ERP, DMS, product, pricing, sales, outlet, employee, and hierarchy systems, cutting manual intervention by approximately **60%** and improving data consistency across platforms.
- Architected implementation strategies for pricing workflows, hierarchy mappings, stock reset processing, delta synchronization, and enterprise master data integrations, ensuring alignment between business requirements and technical delivery.
- Conducted dozens of customer workshops, UAT/SIT cycles, deployment validations, production readiness reviews, and user enablement sessions, coordinating business stakeholders, engineering, and client leadership for successful production rollouts.
- Improved platform reliability by approximately **40%** by diagnosing and resolving production issues across **SQL, Kafka**, and API layers using **AWS CloudWatch** and system logs.
- Designed AI-assisted implementation workflows and reusable playbooks for enterprise delivery, leveraging LLMs to accelerate architecture documentation, API payload analysis, SQL generation, transformation logic validation, root cause analysis, customer communication, and implementation knowledge management.
- Delivered enterprise implementations from discovery through production support, partnering with customer stakeholders, engineering, QA, and product teams across **Thailand**, the **Philippines**, and North India to ensure successful go-live and long-term customer success.

CAW Studios — Hyderabad (Postman, Celito)

Nov 2023 — Jun 2024

Associate SDET

- Built reusable API and UI automation frameworks using Postman and Playwright, improving regression coverage and reducing manual testing effort.
- Improved reporting accuracy by **~25%** using **SQL** to analyze datasets and trace inconsistencies across systems.
- Automated cross-system validation workflows to compare datasets and identify mismatches, reducing manual QA effort and debugging time.
- Partnered with developers to investigate API failures, integration defects, and backend inconsistencies using **SQL** and API inspection, improving release quality and system stability.

Skills

Core: Solutions Consulting, Implementation Consulting, Business Analysis, Enterprise SaaS, Customer Success, Stakeholder Management, Requirements Gathering, Solution Design, Enterprise Implementations, System Integrations, Production Support, Incident Management, UAT, Project Coordination, Root Cause Analysis

Tech: SQL, PostgreSQL, REST APIs, Kafka, JSON, Enterprise Integrations, Data Transformation, Data Validation, Java, Python, AWS CloudWatch

AI: LLM Applications, Prompt Engineering, Context Engineering, Knowledge Retrieval, AI-Assisted Delivery, Agentic Workflows

Tools: Jira, Confluence, Postman, Git, Playwright, Microsoft Excel, Microsoft PowerPoint

Relevant Projects

PIKU — Ambient AI Second Brain (Personal Project)

- Designing and building a local-first **AI** assistant featuring persistent memory, context engineering, knowledge retrieval, and modular agent workflows to improve long-term reasoning, reduce hallucinations, and create a personalized AI system

independent of any single LLM.

ReliveCure — Lead Intelligence & Conversion System

- Built a lead management platform integrating WhatsApp, Meta Ads, and CRM workflows, enabling automated lead qualification, follow-ups, and conversion tracking for inbound sales pipelines.

MandiBhai — B2B Wholesale Marketplace (Mobile App)

- Developed a mobile-first marketplace integrating inventory, pricing, and ordering APIs, enabling real-time ordering and improving transaction workflows between wholesalers and retailers.

Extracurricular

Co-founder — DEBSOC

2021 — 2023

- Co-founded and scaled a university debating society, organizing sessions and discussions, increasing participation and engagement across batches.
- Led workshops and mentored members, strengthening structured thinking, communication, and the ability to explain complex ideas clearly.

Education

Chitkara University, Punjab

2020 — 2024

B.E. — Computer Science

GPA: 9.7
